

**Matrix Adhesives Group is a leading developer and manufacturer of advanced adhesive and sealant solutions sold into industrial, composite, construction, commercial, and specialty applications in easy to use formats. The group brings together the most trusted and innovative brands in the adhesives and sealants market - each with a proven legacy of quality, performance, and reliability.**

The SCIGRIP Adhesives® product line includes high-performing MMA structural adhesives for the transportation, marine, construction, and wind industries. The adhesives are designed for the highest performance in bonding metals, composites, plastics, and dissimilar material bonding. The structural adhesives line requires minimal surface preparation, primer-less metal bonding, and no read-through, and the products are certified to ISO9001, Lloyds, DNV GL, EN45545-2, and PACCAR standards, delivering trusted performance worldwide. Additionally, SCIGRIP Adhesives® offers a line of industrial products for the marine industry which are available in small to large size sprayable formats for rapid and easy application.

The SCIGRIP Sealants product line includes a full range of silicone, hybrid, and acrylic technologies for general purpose, construction, marine, transportation, and industrial applications.

More information can be found at their booth at CAMX, company website at [www.matrixadhesives.com](http://www.matrixadhesives.com), or through the "Contact Us" information.
